

## Lab Final: Programming Task

Write a C++ program to perform the following:

1. Define a `struct Book` with members: `title` (string of max 30 chars), `author` (string of max 20 chars), and `price` (float).
2. Dynamically allocate memory for 3 books using pointers.
3. Input the details of 3 books from the user.
4. Display the book details using pointer notation (`->`).
5. Free the allocated memory at the end.
